Hetauda 44107, Bagmati, Nepal

Full Stack Developer with 5+ years of experience. Experienced in working with large projects and teams following Agile development.

Work experience

Freelancer (2020–Present)

Executed diverse projects for clients across different countries, achieving **Top**

Rated status with a flawless **100% Job Success rate**.

Alphatech Hetauda (2018–2020)

As a junior web developer, actively contributed to numerous projects with a strong emphasis on ensuring high code quality, readability, and long-term durability.

Education

Bachelors in Computer Science & Information Technology (2017–2021)

Percentage: 82.24%

Hetauda City College, Hetauda (Tribhuvan University, Kathmandu, Nepal)

Projects

Otziv io (Feb 24, 2021 – Jun 25, 2021)

A business review platform, Bulgaria

As a solo full-stack developer, I spearheaded the implementation of key features such as authentication modules, app-wide search, and automated email-based review collection, among others.

Global English Campus (Apr 8, 2021 – Feb 3, 2022)

An online english learning campus, South Korea

As a front-end developer, I contributed to the implementation of key features, including student quizzes, integration of face tracking APIs, adaptive learning functionalities, and the development of a CMS for course and quiz creation.

PlaySmart Monopoly (Jan 29, 2022 – Mar 11, 2022)

An educational monopoly game, Nepal

In a solo project, I developed the entire application using React Native. The app, inspired by Monopoly, is designed to educate students about money management.

Timewise (Sept 30, 2022 – Jun 15, 2023)

An appointment booking platform, US

Working as a front-end developer, I worked on various tasks and modules like redesigning the landing page and the customer app, adding features and improvements to the calendar and scheduling, integrating text and email API among others.

Share Sathi (Nov 27, 2023 – Nov 30, 2023)

A meroshare helper, Personal Project

A personal project build using Tauri as a way of learning Rust.

Flyerroom (Jul 2, 2021 – Sep 29, 2021)

A real-estate flyer designing platform, US

As the sole full-stack developer, I independently developed the entire application, with a primary focus on creating a robust flyer editor using Fabric.js.

Learndev (Dec 27, 2021 – May 10, 2022)

Interactive programming school, Germany

As a content writer, I conducted research and created various beginner-level courses and quizzes for HTML, CSS, and JavaScript.

Beercrawl (Mar 14, 2022 – June 22, 2022)

Beer listing & management platform, Australia

As a solo full-stack developer, I revamped the entire application in Vue, incorporating essential features such as user roles, authentication, and a CMS.

Lighting Illusions (June 27, 2023 – July 10, 2024)

An E-commerce website, Australia

In my role as a full-stack developer, I worked have on setting up the project in NextJS, integrating payments using Braintree API, integrating Omnisend among other tasks. I am actively working on optimizing and refactoring the code-base so it is more responsive.

Grace Loves Lace (May 30, 2024 – July 1, 2024)

A booking helper using booxi

Created a booking modal for booking that integrated in grace love lace's website, uses booxi's api to manage time slots.
